

Student Acceptable Use of Technology & AI Agreement

Sutherland Secondary School

Information Communication Technology 9

M. Ahoy

Be Respectful

- Use school devices and accounts for learning only.
- Be kind online. Don't post or share hurtful messages, images, or personal information.
- Respect the privacy of others — don't use someone else's account or files.

Be Safe

- Protect your passwords and never share them.
- Think before you post — once something is online, it's hard to remove.
- Don't visit or share inappropriate websites. If you see something unsafe, tell a teacher or adult right away.

Be Responsible

- Take care of school equipment and respect digital property (like software, music, and images).
- Always give credit when you use information, images, ideas — or AI output — from others.
- Use your personal device at school only with your teacher's permission and for schoolwork.

Be Honest About AI

- AI tools are allowed in this course — like at a real studio — but every use must be documented in your AI log: what you asked, what you got back, what you changed, and what you learned.
- Never submit AI-generated work as entirely your own without disclosing it. Undocumented AI use is treated the same as plagiarism.
- Always review, understand, and edit AI output before submitting it — you're responsible for anything you turn in, AI-assisted or not.
- If you're not sure whether AI is appropriate for a given assignment, ask before you use it.

Understand the Limits

- The school can check devices and accounts if needed to keep everyone safe.
- You are responsible for what you do online at school, including how you use AI.
- Misuse — including undisclosed AI use — may result in losing technology privileges and other consequences.

By signing, I agree to use technology — and AI — safely, respectfully, honestly, and responsibly.
